The Daily Summary Report option gives you a formatted table that summarizes key parameters on your site over a 24-hour period.

This report is extremely valuable for prime mover applications where site performance is vital to contract compliance.

The PointGuard WebCenter can be configured to automatically email the report using a predefined mailing list, or you can log on to the WebCenter and generate a report for any past date, at any time.

The Daily Summary Report is a tool that operations and management will count on to give a timely summary of daily operations, without all the manual effort of collecting and tabulating the data!
