The GPS Mapping service option is a powerful tool for tracking your portable equipment. Whether you need to dispatch a fuel truck, send a service technician, or simply decide where to send the asset next, PointGuard's GPS Mapping can help you do it quickly and effectively. This service is ideal for portable or rental applications where logistics is a challenge.*

Need to give directions to the site? The GPS Mapping module generates driving directions that you can give to your field technician or fuel vendor.

*This service includes a daily automatic update of the GPS position, plus several user-initiated updates per month. Contact PointGuard for pricing on more frequent automated updates
